Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 74-75 and 78-80 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,21 and 31 of U.S. Patent No. 6,897,072. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a mass spectrometry probe with a sample presenting surface having a bound biotin group.

Allowable Subject Matter

Claims 81-109 are allowed.

Response to Arguments

Art Unit: 1743

Applicant's arguments filed 11/20/06 have been fully considered but they are not persuasive.

Applicants state the present invention does not require the hydrogel or is directly bound to the biotin. These remarks are not commensurate in scope with the instant claims that do not exclude additional elements, such as a hydrogel (i.e. the instant claim language is open, comprising). With respect to the claimed "... biotin immobilized by chemical bonding to the sample..." the patent teaches biotinylation immobilizing the biotin by a chemical bond which is indistinguishable from the instant claims.

Applicants state the claimed and patented probes function according to different mechanism. These remarks are not commensurate in scope with the pending apparatus claims. Applicants must structurally differentiate between the instant application and the patent.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
